

Syndication retail allotment

**Notes**

1. System to build multiple allocation methods e.g. uniform pricing method, quantity ceiling method for SSB, syndication - quantity ceiling method for retail syndicated bond.

2. Allotment algorithm to take MAS auction safeguard into consideration e.g. automatically pro-rate MAS B if auction is too strong.

3. Reports for allotment/auction/settlement/underbidding details etc. to analyze allotment results against previous allotments, with adjustable date range (contains all allotments within the date range), reports with the bids from a list of NRIC numbers (internal to MAS), to check that MAS staff did not violate the COI OPM,
